✦ TUBE LEAK DETECTOR KIT

Tube leak detector kit (BVLD-3000) is simple & precise test instrument used by manufacture to identify tube leakage of condensers, heat exchangers, boiler and other Tubular apparatus.

It is the fastest and most accurate method of locating tube leakage for replacement or plugging or installation of new tubes.

It works on the principle of vacuum in which the tool sucks the air from the tube and creates a vacuum to a desired reading on gauge.

Steady reading on gauge indicates NO LEAK.

If the reading on the gauge drops it indicates a tube with a LEAK.
